

Renner Zrt Environmental Policy

Renner Zrt is committed to environmental protection and takes responsibility for future generations. Through our environmental developments, we strive to create safe products and processes that offer the best solutions both from a societal perspective and throughout the product lifecycle.

Our commitments:

- Meeting customer expectations,
- Complying with applicable laws, regulations, and environmental standards,
- Continuously improving our environmental management system based on ISO 14001,
- Supporting the United Nations' Agenda 2030 goals, preventing pollution, and protecting the environment,
- Ensuring transparency and communicating efforts made for sustainability.

Our focus areas:

- Identifying and minimizing the environmental risks of our products and operations,
- Continuously monitoring the materials used by the company to ensure they are as environmentally friendly as possible,
- Monitoring chemical substances and replacing identified hazardous materials,
- Training and developing employees to enhance their expertise and commitment to this policy.

Our goal is to establish a consciously environmentally friendly corporate culture. To achieve this, we engage in continuous and open communication within the organization. We strive to foster environmentally responsible behavior and ensure the resources necessary to comply with this environmental policy.
